Art Unit: 2816

1. The amendment filed on 4/4/05 has been received and entered in the case.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. The disclosure is objected to for the same reason noted in paragraph one of the previous office action, i.e., no amendments have been made by applicant, contrary to what is stated in applicant's remarks.

Appropriate correction is required.

4. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Hidaka et al.

See paragraph four of the previous office action for the details of this rejection. As to the new limitation that the slew rate "can be enhanced" this cannot be relied upon to distinguish over Hidaka et al because (1) it is not a positive recitation of some structure or function of the invention, i.e., it is merely a result, and (2) the slew rate of Hidaka et al of course "can be enhanced" as well since Hidaka et al has parallel coupled FETs with sources and drains tied together, and (3) no

structural difference is seen between what is claimed and what is disclosed by Hidaka et al.

5. Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hidaka et al.

See paragraph five of the previous office action for the details of this rejection.

6. Applicant's arguments filed on 4/4/05 have been fully considered but they are not persuasive.

The argument that FETs 1a, 1b, etc in Hidaka et al cannot be regarded as push-pull devices because they are "not described" is not persuasive because it makes no sense.

The further argument that they are not "complement [sic] type" is also not persuasive because it is not in the claims.

The final arguments regarding Fig. 80A are similarly not persuasive because again nothing in the claims reflects these arguments. It is suggested that applicant carefully review the M.P.E.P. as to the proper way to overcome a prior art rejection, i.e., appropriate amendments and/or arguments.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2816

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
